When security really matters - at no extra cost!

Wiegand 26Bit

Standard

MAGIC BUTTON® MAXIMUM SECURITY REMOTE

The **MAGIC BUTTON**® remote control transmitter is designed to deliver unparalleled security for all domestic and commercial applications.

Features:
- 69-Bit encrypted data transmission guarantees security with each transmitter uniquely coded
- Self learning receiver technology stores up to 340 unique transmitter codes.
- Can be used to replace any existing remote control system.
- Convenient size allows attachment to key-ring or placement under dash with velcro.
- Easy to add new transmitters with the push of a single button.
- Four channel transmitter allows for optimal flexibility.
- 433.92MHz crystal locked transmitter frequency immune from "Ghost openings" caused by baby monitors, 27MHz CB radio etc. In extreme circumstances other radio equipment on the same frequency may cause range reduction. An alternative radio frequency may need to be used which may not offer the same features as the **MAGIC BUTTON**®.
- All transmissions are immune from code grabbing and code scanning techniques as often used by resourceful thieves.

Applications:
- Garage doors, automatic gates.
- Office reception, foyers, commercial buildings
- Remote arming and disarming of security alarms.
- Personal emergency transmitters.

ACCESSORIES
- ➤ Photo electric beams
- ➤ Vehicle Detectors
- ➤ Safety edge profile
- ➤ Emergency stop controls
- ➤ Flashing lights
- ➤ Traffic lights
- ➤ Radio & access control

MAGIC BUTTON®
AUTOMATION

Magic Button® Programmer

The **Magic Button**® **Programmer** offers easy deletion of individual remotes and the simple backup and restoring of all the information on any **Magic Button**® programmable receiver. The **Programmer** ensures the management of the access control system is minimized with little or no disturbance to authorized users and property managers.

· **Delete individual remotes with a touch of a button**

· **Back-up remote information**

· **View information stored on the receivers**

· **Compatible with all Magic Button**® **433MHz receivers**

Features:
- Plugs directly into all Magic Button 433MHz 6-Pin and Hardwire series receivers.
- Simple delete function allows any one (or more) Magic Button remotes to be easily deleted without affecting other stored remotes.
- Easy to completely backup and restore entire contents of any Magic Button receiver within seconds.
- Dual mode serial number display shows either standard hexadecimal Magic Button serial numbers or Magic Button Wiegand decimal card numbers.
- Removable storage chips enable backups of any number of Magic Button receivers to be easily stored and managed.
- Magic Button Programmer derives operating power from the target receiver eliminating the need for internal batteries.

OFFSITE PROGRAMMING OF REMOTES WHEN COMBINED WITH MAGIC CELL

When Magic Button receiver is combined with the Magic Cell GSM device, transmitters can be added and deleted by administrator via SMS or computer software.

Use of Magic Cell also allows users access via phone, The Magic Cell recognises programmed phone numbers and allows access without any call costs. Phone users can be added and deleted with the option of access time zones by administrator via SMS or computer software.

Combining Magic Cell with Magic Button receivers combines the benefits of radio control with GSM technology.
