Magic Cell

OPEN AND CLOSE GATES WITH YOUR PHONE

Magic Cell is a remote access control device that can open gates or doors by phone. The device is connected to the gate or door control and is operated by receiving free charge calls from mobile and fixed line phones. Magic Cell is a sophisticated ID card-based security system, only instead of using ID cards and readers, access is by phone.

Security Levels

Simple: Any user with the access number

Advanced: Authorized users are identified by their caller ID and based on time zone, granted or denied access

Authentication is done without ever charging the caller.

Managing Access Rights

Magic Cell administration is conducted locally via RS232 cable or remotely via a GSM modem, or through the SMS messages. You can manage the access rights of up to 340 users. The users can be managed in up to 8 groups with each groups access restricted to particular times and days.

Applications

- Personal access for homes with far away gates or doors
- Caravan parks
- Where intercoms are impractical due to long cable runs
- Remote arming and disarming of security alarms
- Remote area control, ie. agricultural pumps
- Areas with radio interference
- Back up system for residential car-parks
- Remote monitoring

Features

- Supports up to 340 users
- 8 user groups with separate time slots
- Multiple levels of security
- Remote - SMS based administration
- Local - PC administration via RS232 connection
- Small dimensions
- Plug-and-play
- Can be used in conjunction with special Magic Button receiver to allow remote programming (add or delete) of up to 340 Magic Button remotes via SMS.
- Alarm input connection allows the sending of SMS alert message to selected users when input voltage detected and removed
- Optional 5 second call back on activation to confirm reception of incoming call
