

CONTROL LIGHTS

FLASHING LIGHT KIT

This flashing light kit is suitable for situations where the movement of doors or gates must be signaled or where there is a need to assure peoples safety.

The kit is made using quality materials and comes complete with an orange light, protection cage, mounting bracket, adapting disk and a light flasher board.

- *Protection Cage:* helps to protect light from damage and is easily mounted using the adapting disk.

- *Mounting Bracket:* simplifies the fixing of the light, and can also be used to mount an antenna.

- *Adapting Disk:* used to fix the protection cage to the mounting bracket. (Not shown)

- *Light Flasher board:* enables the light to flash during operation.

TECHNICAL FEATURES

- 220V AC
- 40 Watt bulb (average life of 1,000 hours)
- Zinc coated steel protection cage
- Total weight: 800g (light, cage, bracket, disk).

TRAFFIC LIGHT

This LED type traffic light is suitable for a variety of applications where there is a need for traffic control. It is easy to install and has a rotation of 200° with clicks of 3°.

Made from quality materials, this traffic light offers a longer than average life of up to 10 times that of a normal lamp, and has lower energy consumption and maintenance costs.

The red and green LED's are brighter than lamps and consist of 2 cards made up of 25 cells. If one of the cells becomes damaged, the traffic light will continue to work.

TECHNICAL FEATURES

- Power supply: 24V AC/DC
- Consumption per hour (for each card): 3 Watt
- Average Life of LED: 100, 000 hours
- 200° rotation with clicks or 3°
- Weight: 2.7 Kg
- Housing: extruded anodised hot-painted aluminium
- LED Aspect: 120mm Diametre
